

# Pots/RJ11 Interface:

Optional accessory

- Mount the analogue phone, and plug the RJ11 cable (up to 600m length) into the PotsDOCK Extreme RJ11 port.
- 2. Lift the RJ11 POTS phone handset "OFFHOOK" and listen for a dial tone.
- Dial (using the full country codes) on the RJ11 telephone keypad.
- How up to 5 seconds for the call to be issued to the Iridium Extreme handset, at which point the progress message appears on the Iridium Extreme handset.

## PotsDOCK Extreme USB Data Port:

The PotsDOCK **Extreme** has an integrated USB Data Sata Port on the rear. Drivers for this USB port can be downloaded from:

## www.beamcommunications.com/support

options

## Tracking & Alert

Tracking & alert requires the GPS antenna and setup of the tracking and/or alerting messages in Eagle and in the Iridium Extreme Handset.

## **External Alert Loop Button:**

Connect a Normally-CLOSED button, to the Brown and Green wires (it can be extended for longer runs).

The loop needs to be OPEM (press button) for 2 seconds to

# Privacy Handset:

activate Alert (SOS) mode.

- Mount the handset cup to the mounting plate.
- Mount the spacer plate and the mounting bracket, by using the longer screws provided with the kit. (Reinstalled the RAM arm-bracket behind these plates).
- Connect the Privacy Handset 3.5mm plug into the loom socket connector.
- Privacy Handset must be returned to cup when not in seu.

## Mounting Cradle

The PotsDOCK Extreme is supplied with a universal RAM® mount bracket that enables mounting to any flat surface (vertical or horizontal) within a vehicle, or other required location.

 Attach one pivot base to the rear of the PotsDOCK Extreme using the M4 screws and washers supplied.

 Secure the second pivot base to the location you have selected for mounting the PotsDOCK Extreme. (Screws not supplied)

 Use the interconnecting arm of the RAM® mount to secure the PotsDOCK Extreme to the pivot base and tighten into the desired location firmly using the wing nut on the arm.

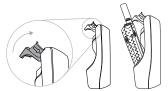

## **Inserting and Ejecting Extreme Handset**

#### Inserting:

 At the base of the Iridium Extreme handset there is an accessory connector cover. Open the cover and move it to the back of the handset, securing it to the two rear retaining features.

 Press down the latch button and then gently rotate it up to open the latch. Place the Iridium Extreme handset into the PotsDOCK Extreme.

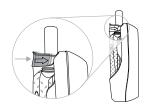

3. Lift the latch back over the handset until it Click's into place.

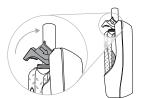

#### Removing:

 To remove the handset, first press the eject button and then rotate the latch up away from the handset. The handset can now be slid up and out of the PotsDOCK. Refit the accessory connector cover to maintain the IP rating of the Iridium Extreme handset.

#### Iridium Antenna Connection

The antenna connections exit from the rear of the PotsDOCK Extreme cradle, via the antenna loom. There are two RF connections required, the Satellite TNC Female Connector and GPS SMA Female connector.

Refer to the antennas installation guide for antenna mounting and location requirements.

#### WARNING

DO NOT pull with force on the cables from the rear of the PotsDOCK. Please install strain relief clamping for the antenna cables where required. Correct installation of the antenna system is a vital

Correct installation of the antenna system is a vital part of the PotsDOCK system, to ensure reliable functionality, and drop-free calls.

## **PotsDOCK Extreme Front Panel**
