

Devices tab Overview for Administrators & Monitors [GPv3]

Lu Parente - 2015-10-06 - in Devices Tab

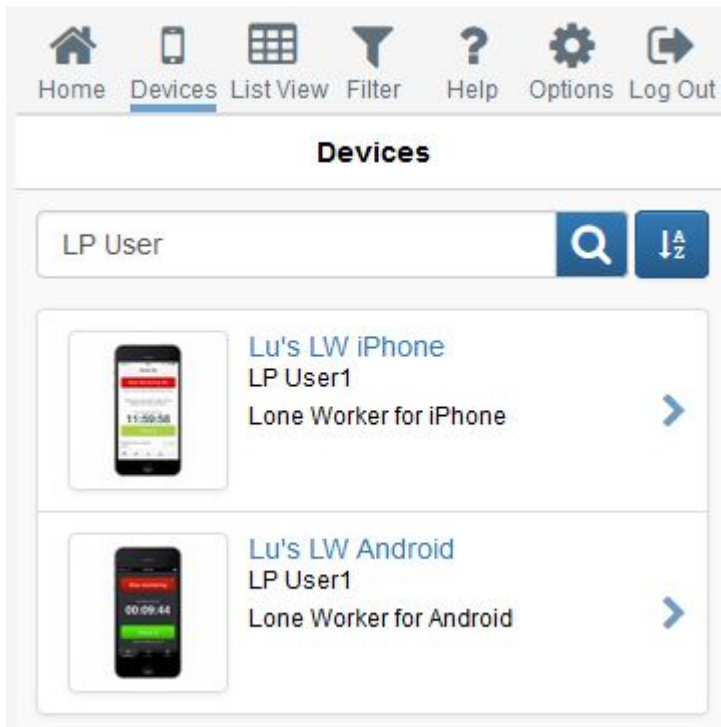

The **Devices** tab provides the Administrator and Monitor with the ability to perform a number of different actions on any of the devices provisioned to your account.

When viewing the Devices tab while logged in as an Administrator or Monitor, you will be presented with a list of all devices on your account.

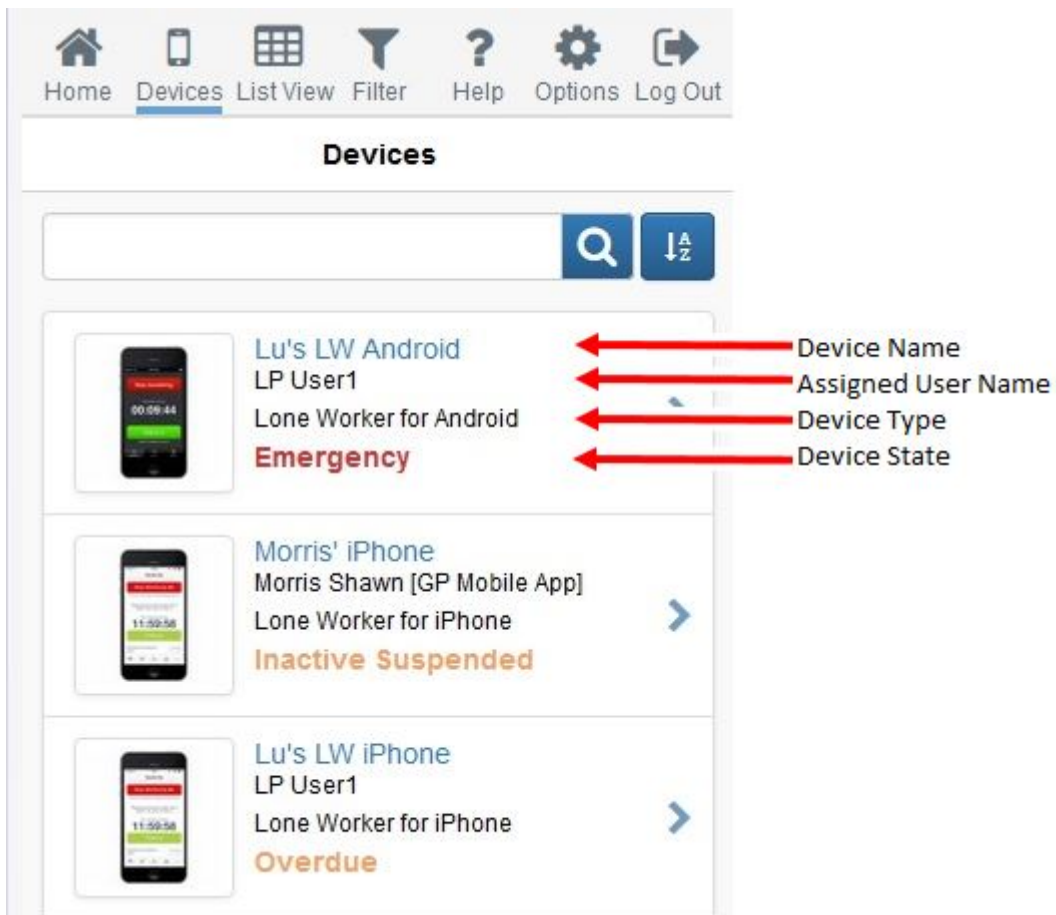

The screenshot displays the GeoPro web application interface. On the left is a map of North America with a green circle and the number '5' over the Chicago area. On the right is a 'Devices' tab with a search bar and a list of five devices:

Device Name	User	Status
Morris' iPhone	Morris Shawn [GP Mobile App]	Lone Worker for iPhone
Lu's LW Android	LP User1	Lone Worker for Android
Lu's LW iPhone	LP User1	Lone Worker for iPhone
Lu's Extreme LP LP	Iridium Extreme	Inactive Suspended
TS IR SE	Lu Parente [USER]	inReach SE

Use the search box to search by **device name**, **device IMEI**, or **assigned user name**.

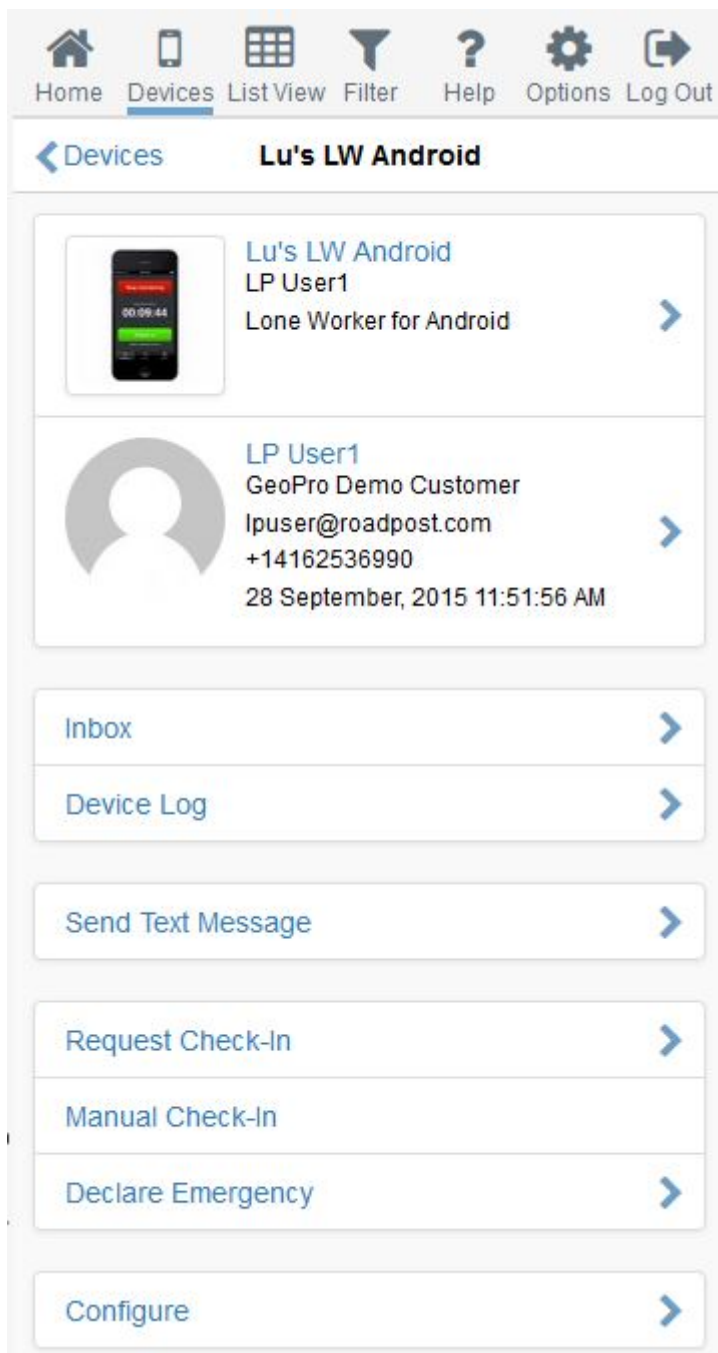

The device tile displays some key information pertaining to the device.

Selecting any device tile from the device list will navigate you to the device page. From the device page, you'll be able to view the assigned user and their details, view the device's **Inbox** and **Device Log** and perform functions such as **Send Text Message**, **Request Check-In**, **Manual Check-In**, **Declare**

Emergency.

By selecting **Configure** you can also view and setup additional **Device Details**, the **Address Book**, **Event Notifications**, and a **Check-In Schedule** for the selected device.

Note: Event notifications are view only at the device level. Event notifications can be configured by navigating to **Options** followed by **Event Notifications**.
