

Editing your Points of Interest from the Options tab [GPv3]

Lu Parente - 2015-11-12 - in How-To

Points of Interest (or POIs) allow you as a User, to mark specific location points on the map which only you can view. Administrators or Monitors also the ability to define points of interests on the map which can be made **visible to all users** in the tenant. A point of interest can be given a description and unique icon and colour. Points of interest can be extremely useful for Monitors while assisting users with day to day logistics or even in emergencies.

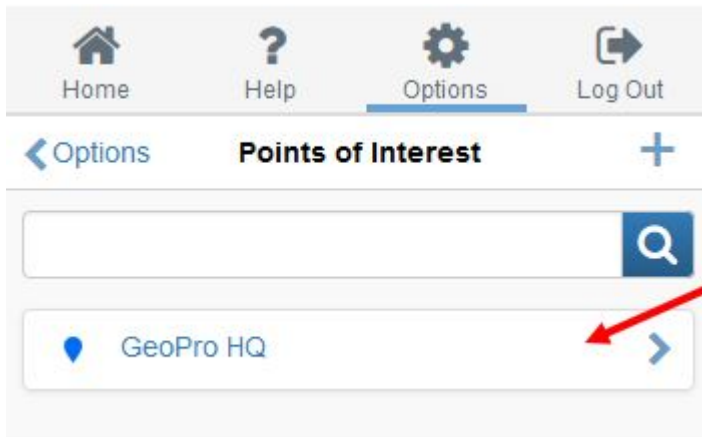

This article explains how to edit an existing point of interest.

1. To edit an existing point of interest, navigate to the **Options** tab and select **Points of Interest**.

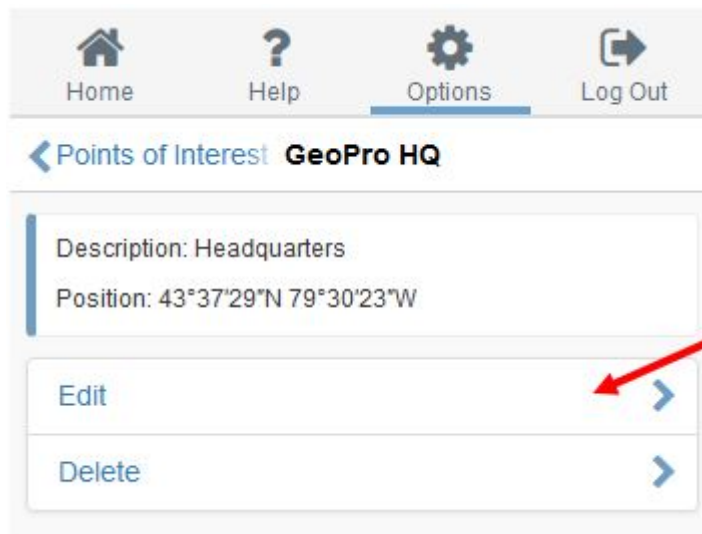

2. The Points of Interest page will be displayed. You now have the ability to **create**, **edit**, and **delete** your points of interests.

To edit a point of interest, select the one from the list.

3. The point of interest details page will be displayed. Select **Edit** to modify the details of the point of interest.

4. Modify any of the details for your point of interest. You can also move the location of your point of interest by selecting it on the map and dragging and dropping it to a new location. When finished, press **OK** to save your changes.
