

Locating a Device's Email Address from the Devices tab [GPv3]

Lu Parente - 2015-11-18 - in [How-To](#)

Administrators and Monitors have the ability to locate a device's email address. The GeoPro web app assigns a unique device email address that can be used to initiate communication with a device from out side of the GeoPro web app. Someone that does not have access to the GeoPro web app or just wishes to communicate via email, can use the device email address to send 160 character **text-only** messages.

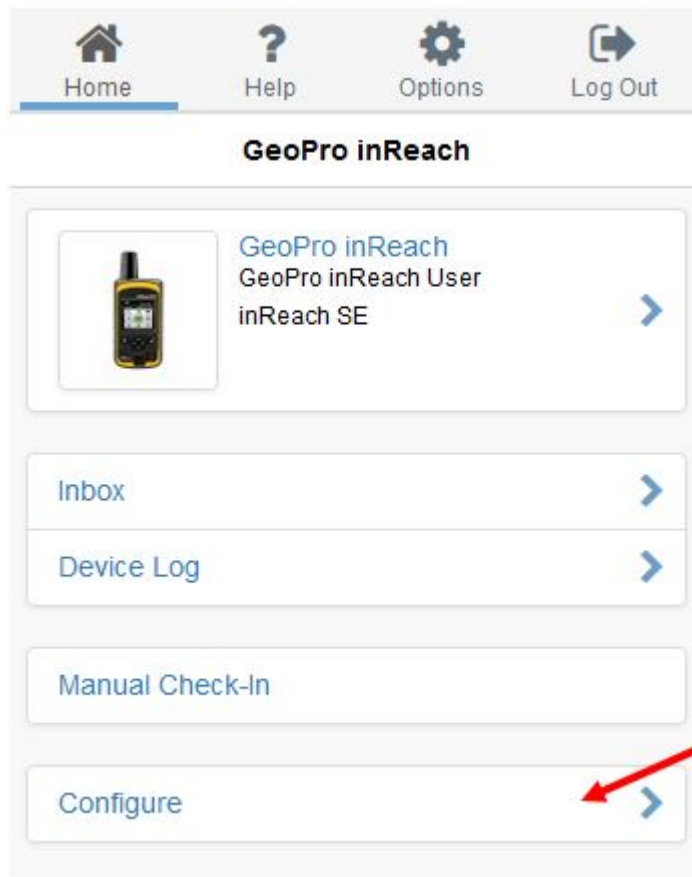

Note: Attachments, graphics and HTML should be completely avoided.

1. To locate a device's email address, navigate to the **Devices** tab and select the desired device.

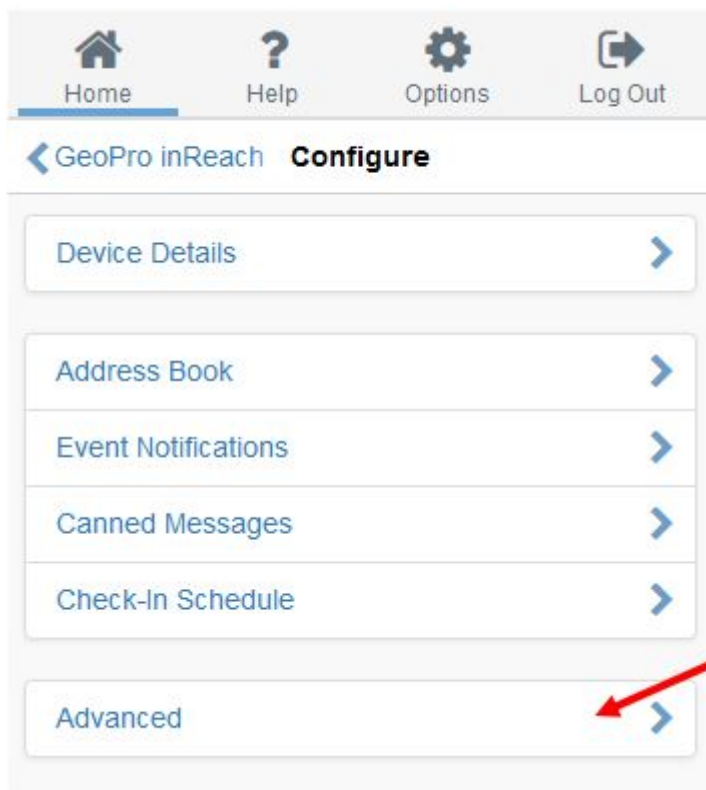

Device Image	Device Name	User Type	Device Model	Action
	GeoPro LW Android	GeoPro Android User	Lone Worker for Android	>
	GeoPro LW iPhone	GeoPro iPhone User	Lone Worker for iPhone	>
	GeoPro Extreme	GeoPro Extreme User	Iridium Extreme	>
	GeoPro inReach	GeoPro inReach User	inReach SE	>

2. The device page for the selected device will be displayed, select **Configure** from the list.

3. From the device configuration page, select **Advanced** from the list.

3. The **Advanced** page will display specific information pertaining to the selected device. The device email address will be displayed under the **Email Address** heading.
