## Placing an Inmarsat Test Call

David Jones - 2018-06-12 - in How-To

Inmarsat postpaid and prepaid customers can place a free call to +870-776-999-999 to test their phone. An automated message will play stating that the call was successful. If an error message is played or if the call does not connect at all, please contact [Roadpost customer service](#).
