

Selecting a Device from the Devices tab [GPv3]

Lu Parente - 2015-09-29 - in [How-To](#)

Selecting a device tile from the device list will navigate you to the device page and allow you perform a number of device related functions.

1. Start by selecting a device from the device list on the **Devices** tab.

2. You are now presented with the device page. From here you can view the **assigned user** and their details, view the device's **Inbox** and **Device Log** and perform functions such as **Send Text Message**, **Request Check-In**, **Manual Check-**

In, Declare Emergency.

The screenshot displays a mobile application interface with a top navigation bar containing icons for Home, Devices, List View, Filter, Help, Options, and Log Out. Below the navigation bar, the page title is 'Lu's LW Android'. The main content area is divided into several sections:

- Device Card:** Features a smartphone icon with the time '00:09:44'. Text includes 'Lu's LW Android', 'LP User1', and 'Lone Worker for Android' with a right-pointing arrow.
- User Card:** Features a grey person icon. Text includes 'LP User1', 'GeoPro Demo Customer', 'lpuser@roadpost.com', '+14162536990', and '28 September, 2015 11:51:56 AM' with a right-pointing arrow.
- Navigation List:** A series of buttons with right-pointing arrows:
 - Inbox
 - Device Log
 - Send Text Message
 - Request Check-In
 - Manual Check-In
 - Declare Emergency
 - Configure

3. By selecting **Configure** you can also view and setup additional **Device Details**, the **Address Book**, **Event Notifications**, and a **Check-In Schedule** for the selected device.

Note: Event notifications are view only at the device level. Event notifications can be configured by navigating to **Options** followed by **Event Notifications**.
