Iridium GO!® Mail & Web Android App Update Available

2019-05-29 - David Jones - in Announcements

An update is now available for the **Iridium GO!® Mail and Web App** for **Android** devices and can be accessed via the [Google Play Store](#). This update provides compatibility with the latest Android 9 i.e. Pie release and resolves the “No Wi-Fi” error message received by Android 9 users.

While this release is not mandatory, it is strongly recommended that the update be performed as soon as possible to enable the best service experience.

If you need assistance, please contact [Roadpost Customer Care](#).
